

Does a string follow a 123-456-7890 pattern like a phone number?

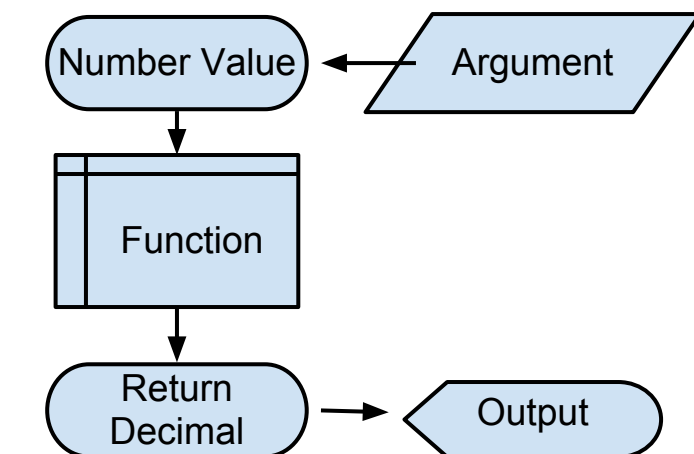

Is the string a URL? (Does it start with http: or https:?)

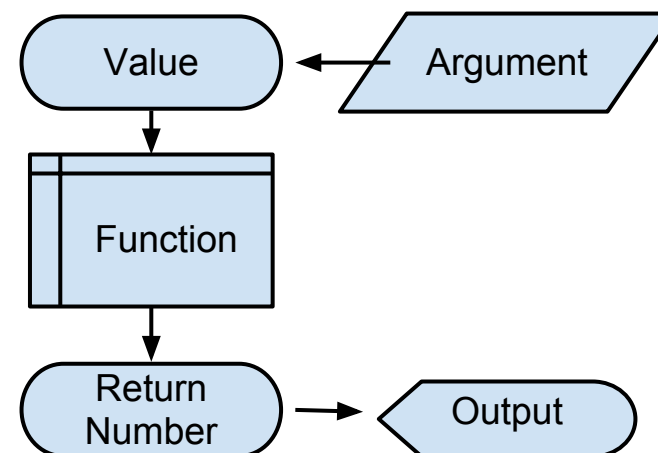

Title-case a string (split into words, then uppercase the first letter of each word).

Format a number to use a specific number of decimal places as for money: 2.1--->2.10.

Given a string version of a number such as "42", return the values as an actual Number, such as 42.

Given an array of objects and the name of a key, return the array sorted by the value of that key in each of the objects:
"a" + [{a:2}, {a:3}, {a:1}]
--> [{a:1}, {a:2}, {a:3}].
(array.sort)
